

ANNIE ROSE WEBB

I'm a high-energy junior developer with experience in front and backend software development, accessibility requirements and testing, TDD, modern frameworks, and Wordpress.

I have a degree in Cognitive Science from the University of Toronto.

 - *INVISION*
 - *GIT*
 - *REACT*
 - *VUE.JS*
 - *DOCKER*
 - *PYTHON*
 - *WORDPRESS*
 - *ACCESSIBILITY*
 - *PHOTOSHOP*
-

RECENT EXPERIENCE

2019

I am currently the webmaster for two online retail boutiques (one Wordpress). My day-to-day includes taking care of their Ruby legacy code, keeping on top of framework updates, minor graphic design and advertising and a lot of emails.

2018

From May to September 2018 I was a software development intern at Tembo, making their Vue.js and React frontend maintainably accessible and creating and testing components in Python and Jinja.

2017

I spent February 2017 - March 2018 at Coded by Kids, a Philly nonprofit working to provide resources for underserved students. I taught HTML, CSS, JavaScript and Git; spearheaded their student-led dev shop and managed ops for 17 high school programs.

2016

Before 2017, I worked in multiple lab settings. In Toronto, I prototyped a communication app in InVision for users with dementia, and conducted two EEG studies. I also collected and analyzed data in MATLAB at Imperial College London.
