ANNIE ROSE WEBB

I'm a front-end software developer focused on accessibility.

I love interesting challenges, open-ended questions, podcasts, iteration, learning new skills, arguing about frameworks, building for real people, and working with enthusiastic teams.

SUITE SKILLS

- *HTML / CSS*
- *GIT*
- *PYTHON*
- *SCSS / SASS*
- *JAVASCRIPT*
- *ACCESSIBILITY*
- *BOOTSTRAP*
- *VUE.JS*
- *CLIENT RELATIONSHIPS*
- *JQUERY*
- *FLEXBOX*

RECENT EXPERIENCE

NOW Since May 2018 I've been a software development intern at Tembo, making their (Python backend, Vue.Js frontend) systems accessible and creating and testing components.

THEN I spent February 2017 - February 2018 at Philly nonprofit Coded by Kids, teaching HTML, CSS, JavaScript and Git, spearheading their dev shop and managing 17 high school programs.

ALSO As part of my Cognitive Science degree, I designed an accessible communication app with InDesign and built basic applications with Python. I've worked often with Agile/Lean methodology, and I love working with clients to find the right solutions for them.
